

LS2 Kids

Software for the next generation

The Library Corporation developed LS2 Kids for today's curious and technologically proficient young school children.

LS2 Kids is the child-friendly version of TLC's successful LS2 OPAC – the same technology with new features oriented to your youngest students.

- A search box provides spelling suggestions and corrections when needed.
- A category wheel offers dozens of subject areas ranging from math and reading to baseball, cats, and scary stories. Add new categories at any time.
- Find books in a series more easily with a predefined list of popular titles like "Harry Potter," "Junie B. Jones," and "The Magic School Bus."
- An interactive title display allows users to magnify book jackets to screen-filling proportions and find detailed information about their selections.

LS2 Kids is simple, intuitive, and playful – the perfect companion to TLC's Library•Solution® for Schools.

Check out the advantages offered by LS2 Kids by calling TLC at 1.800.325.7759 or 304.229.0100, or visiting www.TLCdelivers.com
