

AuthorityWorks™ :

ILS-Neutral Authority Control System

Sending your database out for authority control processing can be costly and repetitive. Now you can keep your authorities continuously current with a front end solution from TLC that lets you retain local control and save significant funds long term.

Regardless of your library automation system, AuthorityWorks enables you to perform bibliographic processing, as well as authority verification and updating, continuously and automatically.

The AuthorityWorks cataloging service features:

- Multiple authority update options – fully automatic, partially automatic, or moderated with side-by-side display
- Automatic flipping of obsolete headings
- Dynamic linking of the local authority file with national authorities
- Cataloger's Reference Shelf, a context-sensitive electronic library of MARC manuals and code lookup tables
- Powerful MARC editor
- Global editing
- Macro scripting language
- Z39.50 client with profiler, providing custom access to millions of MARC records from various free or licensed sources such as OCLC, RLIN, ITS•MARC®, or shared state and regional resources
- MARC-aware copy-and-paste operations from field to field, record to record, or from other applications (e.g., word processors)
- Easy label production with WYSIWYG preview
- Sixteen indexes (access points) to local data, including alternate title or entry
- 856 field editor for Internet links

Turn to AuthorityWorks for:

- Complete authority control processing – bringing your database into adherence with the latest national standards
- Ongoing access to dynamic authority control processing in a fully automated environment to allow you to easily and effectively manage all authority inputs into your current ILS's database
- Live, online access to national authority files including Library of Congress, LC Juvenile, National Library of Medicine, SEARS, and your own local authority files

Dynamically resolve the authority control issues facing your library with TLC's AuthorityWorks.

Call TLC for more information at 1.800.325.7759.
