

# Online Selection & Acquisitions

**Online Selection & Acquisitions** is a comprehensive, standalone solution that supports all aspects of collection development, acquisitions, fund management, and order management.

Now you can eliminate the tedium and multiple processes associated with paper-based acquisitions. Online Selection & Acquisitions simplifies the complexities of acquisitions with capabilities that include:

- Centralized and de-centralized collection development and selection
- Fund management and reporting
- Electronic ordering with acknowledgements
- Electronic invoices
- Order management and reporting

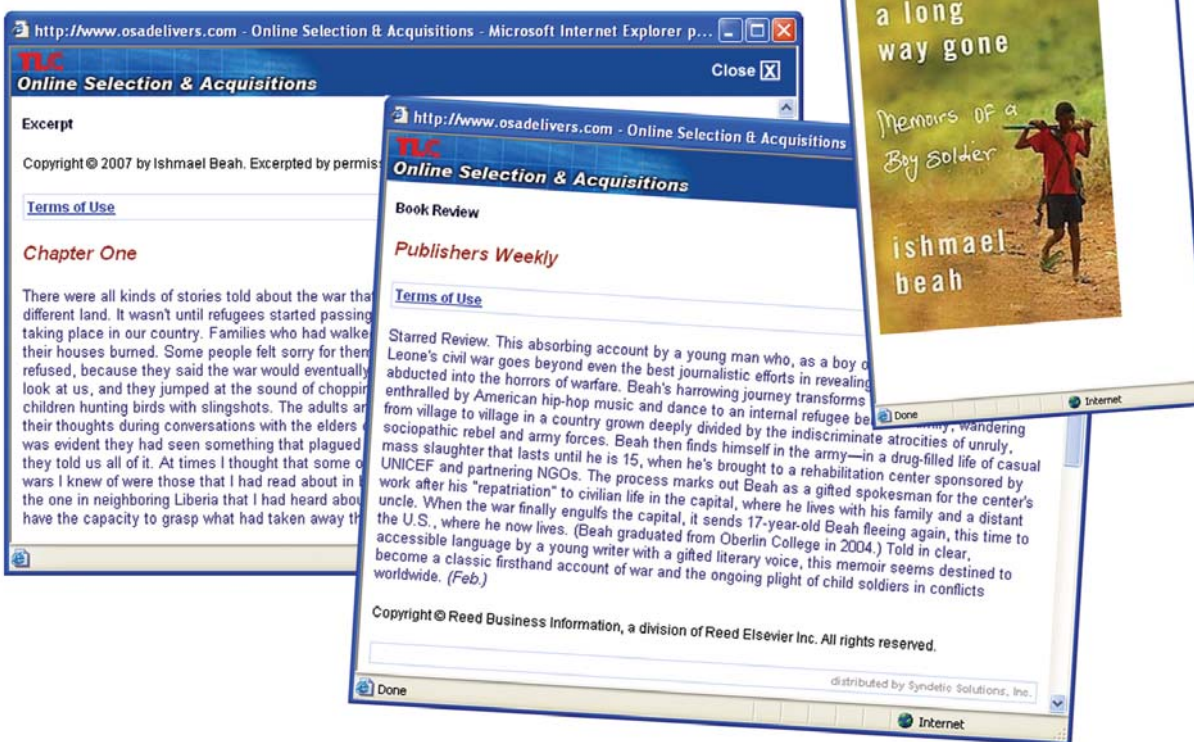

## Current List Prices and the Latest Titles

Databases included and updated weekly are from Baker & Taylor, Brodart, BWI, Ingram, Recorded Books, Midwest Tapes, and Quality Books. Each provides current list prices and titles. You can search them and other Z39.50 accessible databases individually or concurrently to create selection lists. Then, "share" your lists among staff members.

TURN OVER →

Online Selection & Acquisitions includes content such as summaries, chapter excerpts, book reviews, and more enrichment elements.

### Electronic Orders, Acknowledgements, and Invoices

Online Selection & Acquisitions uses the industry standard X12 format to electronically transmit orders, and to receive order confirmations and electronic invoices. Order confirmations allow you to determine order status without visiting the vendor's Web site. Electronic invoicing eliminates having to manually match items to an invoice.

### Workflow Efficiencies

You can provide workflow efficiencies:

- Select titles and apply distribution quantities in one step
- View fund effects before transmitting orders to vendors
- Use powerful and up to the minute fund and order management reporting capabilities
- Manage your receipts independently of your invoice approval process

### Use It with Any Integrated Library System

Online Selection & Acquisitions can interface with any integrated library or school library system that can load MARC records. On-order information created in Online Selection & Acquisitions can be downloaded into your library's local catalog. Instead of simply having brief MARC order records, you can use full MARC records available from TLC's ITS•MARC®, OCLC, or similar Z39.50 compliant resources.
